Overview (technological principle, mechanism, etc.)

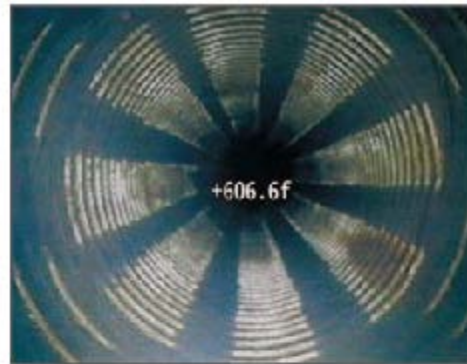

This is a compact camera for inspecting water wells with an internal diameter of between 75 and 500 mm and a depth of up to 300 m.

With the high-performance CCD camera, side and down views can be viewed. In addition, the camera can rotate by 360 degrees and shoot video of the inside of the well. The video can then be written to DVD using the attached DVD recorder by a single button operation.
