

# Asahi Chemical & Industrial Co., Ltd.

Control the 「WATER」 according to the purpose.  
「WATER」 an important source of life.

## Feature

- ⊙ Design and Construction of water treatment facilities
- ⊙ Design and Construction of wastewater treatment facilities
- ⊙ Proposition of water treatment to the water quality
- ⊙ Attentive after-service, such as water quality analysis

Rapid Filter + Softener  
(River Water treatment)

Wastewater treatment (High salt concentration  
waste water treatment by the halophilic microorganisms)

## Summary (Technical principle and Operation)

### Water treatment

A combination of filtration equipment, Deferrization & Demanganization, Ion exchange, equipment, Demineralizer, Activated carbon filter and we carry out the complete design and construction and user's request of treated water quality and raw water quality.

### Wastewater treatment

We carry out the design and construction in order to check the water of out of the factory and effluent standard of the region.

### Water treatment chemicals

We will advise to analyze water quality and after service as a supply chemicals much to the water quality.

Chemicals for boiler water treatment  
and Cooling/Hot water

Full automatic well water treatment  
(Deferrization & Demanganization + Softener)

## Delivery Results

---

|           |  |
|-----------|--|
| Vietnam   | Demineralizer, Softener, Deferization & Demanganization filter |
| Thailand  | Demineralizer  |
| UAE       | Demineralizer  |
| Singapore |  |
| Indonesia |  |

And Japan domestic users

## Effect

---

Function until today to deliver water treatment is working perfectly.  
It has been welcomed by each customers.
