

Koei Spring Industry Co., Ltd.

Various Types of Springs

- General spring manufacturer supplying high quality springs to a variety of fields

Features

- Springs of high precision and quality are provided to customers.
- Our springs comply with severe use conditions including corrosion resistance and heat resistance.
- We produce a variety of springs ranging from minute springs to over 300 kg large springs.

Overview (Technical principles, actions, etc.)

Our springs of high precision and quality are manufactured by experienced specialist technicians. Our products range from very small springs, or less than 1 mm in line diameter, to gigantic springs exceeding 90 mm in diameter and weighing over 300 kg.

We also provide springs made of special steels, such as stainless steel, SKD or Inconel, excellent in corrosion resistance and heat resistance, needless to say springs of general steel.
